Art Unit: 3632

This the first office action for serial number 09/812,853, entitled Tilting Support Device Having Damping Device, filed on March 21, 2002.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee 5,597,144. Lee discloses an object (figure 1), a base (30), legs (40), a spring member (70, 62, and 63), a tube (61), couplers (50), extensions (51).

Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Gretz et al. (Gretz) 5,356,003. Gretz discloses a tilting support device comprising an object (15), a leg (34 and 35), and a means for damping rotational movement (44 and 47).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3632

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, 9, 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee in view of Gretz as above. Lee discloses all of the limitations of the claimed invention except for the means for damping. It would have been obvious to one having ordinary skill in the art at the time of the invention to have modified Lee to have included the means for damping as taught by Gretz for the purpose of facilitating the legs to the open position therefore reducing the chance of damage.

Allowable Subject Matter

Claims 11-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
